

NAME	DATE <b>02 / 12 / 2024</b>	MARK:
SUBJECT <b>ASIX1-DAW1/SM1/TASK A7 (Skills assessment 1)</b>	AC.YEAR <b>2024 - 2025</b>	

**PART 1 - Question 1 to 3**

- Ask us to check your answers only when you have solved all questions of this part.
  - If you can not answer all the questions in this part, asks us to check the questions were able to solve and then starts the next part.
  - Once this part is corrected, you will not have an additional opportunity to answer unsolved questions.
- Username: **sm1**  
Password: **kkdvak**
- 

**1- (2 points)** The administrator made two errors and users can not boot **Windows**. Fix the problem caused by these errors and start **Windows**.

**2- (1,5 point)** One error made by the administrator prevents your user **sm1** from opening **https://www.binefa.cat** or any other website on internet. Fix the problem caused by this error. Then, open **https://www.binefa.cat/sm1/index.html** and display its contents.

**3- (1,5 points)** Documentation written by the administrator is incomplete and your user **sm1** does not know the location of a very important file called **VeryImportantInformation.txt**. Locate this file and display its contents.

**PART 2 - Questions 4 to 6**

- Ask us to check your answers only when you have solved all questions of this part.
- If you can not answer all the questions in this part, asks us to check the questions were able to solve and then starts the next part.
- Once this part is corrected, you will not have an additional opportunity to answer unsolved questions.

---

**4- (3 points)** The administrator made two errors:

- He/She forgot to install a graphical program required to create partitions on the hard drives attached to the system.
- He/She forgot to make available a **2GiB (2,1GB)** hard drive attached to **SATA1** that was added to the system.

Fix both problems caused by these error and create a folder called **Question4** in the **2GiB** hard drive. Display the contents of the **2GiB** hard drive.

**5- (1 point)** The administrator made two errors and your user **sm1** can not open any picture stored in a folder called **Picts** located on her/his desktop. Why?

**6- (1 points)** Now, fix the problem caused by these errors and display any image stored in the **Picts** directory.
